The following is an examiner's statement of reasons for allowance:

The claimed invention is allowable over the prior art of record because said art fails to teach or suggest a structured abrasive article and method of making and using it, wherein the structured abrasive article comprises the claimed specific abrasive composites on a backing, said composite comprising (1) ceramic aluminum oxide abrasive particles, having the claimed size, in a binder and (2) the claimed height and (3) faces of the composites being defined at least partially by a parabolic function. In addition, the specification and declaration filed clearly shown criticality for the claimed limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
